This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE.

THERE are some improvements introduced into this Edition, which it is presumed will be found useful.

The New Books of 1851 have been added, up to the time that each sheet passed through the press; the delay occasioned in publishing the Work has been caused by a desire to make it as correct as possible; and to incorporate all the alterations in price, &c., up to the date of publication.

The Titles in many instances have been made more intelligible. The Authors' names have also been more correctly defined and arranged.

Works published in Series, such as "Lardner's Cyclopædia," "Bohn's Libraries," &c., although still remaining under their respective heads, are now also Catalogued in the regular alphabet throughout, so that those who do not remember in what Series any particular book was published, will be able to find it without trouble.

The Dates of Works relating to Voyages and Travels, as well as Statutes, Law Reports, &c., are now inserted.

In long alphabets, such as Jones, Smith, Taylor, Williams, Wilson, considerable difficulty has existed in finding out titles when the Christian name is not known; to facilitate reference, a duplicate list of each, in one alphabet, will be found at the end of the Catalogue, arranged under the titles of the respective works.

In other respects the arrangement of the last Edition has been adhered to, but it will be observed that the present is printed on larger paper, and contains nearly one-fourth more matter.

The Publisher recommends those who purchase the "London Catalogue of Books, 1816–51," to preserve it. Subsequent Editions will not embrace so long a period of years, and, as this book will not be reprinted, it will be well to bear in mind, that the only correct record of books published some thirty-five years back, is to be found in the present edition.

THOMAS HODGSON.
